PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42d Street, New York, N. Y.

INDEX TO VOLUME 9

January to December 1938

January 1– 44
February 45– 88
March 89–130
April 131–156
May 157–200
June 201–240
July 241–280
August 281–320
September 321–360
October 361–420
November 421–460
December 461–504

A

Accelerated and decelerated linear motion elements. J. E. Hyler..... *28
Adding machine, Smith-Corona..... *212
Air cleaner 329

Air Conditioning:

Santa Fe air-conditioned bus..... *288
Waukesha air conditioner for buses.. *442
Aluminum alloy joints. Bennett & Fernsler *472
Aluminum plating. R. F. Yates..... *481
American Society for Testing Materials meeting 311
Ammeters and wattmeters..... *54

Appearances and Finishes:

Cleaning processes for product finishes. J. Delmonte *13
Developments in finishes and protections *451
Fluorescent coating used for light source 312
Magnetic measurement of coating thickness 190
Metallic coatings. J. Delmonte, pt. 1, *113; pt. 2..... *174
Plastic part design. F. H. Johnson *60
Plating aluminum. R. F. Yates..... *481
Protective coatings for product finishes. J. Delmonte..... *67
Quick-hardening synthetic enamel. T. J. Little, Jr..... 346
Resin coatings that can be applied cold. M. C. Smith..... *303
Testing finishes in General Electric. J. R. Brossman..... *338
Textured enamels for improved wrinkle finishes. A. Miesem..... *254
Ash receiver for car seat back..... *285

Automobiles:

Design details of 1938 models..... *474
Fiat model has reversed engine..... *55
Radiator shutters, manually controlled *97
Studebaker chosen as best designed car 78
Suspension systems used on passenger cars *306

Awards:

A.S.T.M. Dudley medal awarded to Heyer 311

B

Battery charger on wheels..... *450

Beams:

Beams under simultaneous transverse and axial loading. R. J. Roark (Ref. Bk. Sheets)..... *42

Bearings:

Ball bearings 437
Combination ball and roller journal box *250
Engine bearing life dependent upon manufacturing methods and materials. A. B. Willi..... *381
Felt-washer acts as mist seal for motor ball bearing. J. L. Brown.. *25
Beer dispenser *431
Blower pump design..... *6
Book reviews..... 86, 128, 197, 277, 318, 417, 458
Boring machine, Diamond..... *164
Boss, coined, on malleable iron casting... *163
Brake, two speed, for bicycles..... *162
Bus, air conditioned..... *288
Bus, Reo streamlined..... *211
Butter cutter *11

C

Camera, Eastman Bantam..... *454
Caps, covers and plugs. H. J. Martin, pt. 1, *456; pt. 2..... *492
Car, railroad dump..... *431
Car, trolley, streamlined Brilliner..... *471

Castings:

Advantages of die-cast or stamped parts. Herbert Chase 282; pt. 2... *398
Centrifugal castings *242
Centrifugal castings. G. F. Fernier... 491
Saucer-shaped die-casting *285
Selecting material and the type of fabrication for castings..... *19
Cleaning machine, dry..... *436
Cleaning metal surfaces. J. Delmonte.... *13
Clock case of zinc alloy..... *285
Clutch developments *438
Coatings, protective. J. Delmonte..... *67

Color:

Standard colors for plumbing fixtures 30
Compressor, air *166
Computing machine built-in desk..... *290

Controls:

Automobile radio automatic tuning control *327
Boring machine has control rod..... *164
Built-in electrical controls for grinder. *446
Crane truck controller..... *210
D.C. magnet coils—method for calculating ampere turns. G. L. Moses (Ref. Bk. Sheets)..... 503
Draft control for furnaces and stokers *254
Drilling machine electrically controlled *161
Electric hydraulic controls..... 436
Electronic control. R. A. Powers, 132; pt. 2, *168; pt. 3, *219; pt. 4, *340; pt. 5 ..... *385
Gear hobbing machine with hydraulic control *466
Interlocked hydraulic-electric control for drilling machine..... *448
Magnet coil design. G. L. Moses..... *483
Molding machine controlled with hydraulic control *444
Photoelectric relay for light control.. *139
Press with electrically controlled air operated friction clutch..... *391
Solenoid controls 436
Solenoid-operated control for grinder. *330
Temperature controls electrically operated. R. A. Smart..... *202
Types of automatic timers. Gilbert Smiley *146
Washer with automatic timing control *163

Conveyors:

Roll-over for conveyors..... *167

Corrosion:

Protective coatings. J. Delmonte.... *67

Couplings:

Flexible couplings 438
Covers, caps and plugs. H. J. Martin, pt. 1, *456; pt. 2..... *492
Crane truck *210
Cutting machine, automatic..... *248

D

Dental chair has motor operated hydraulic lift *250

Design, Calculations and Examples:

Advantages of die-cast or stamped parts. Herbert Chase..... *282
Air cleaner *329
Air compressor *166
Air conditioner for buses..... *442
Ammeters and wattmeters..... *54

633204

LG05.1
P943

Analysis of variations in products. A. G. Brooks....*322
Automobile models of 1939....*474
Blower pump design.... *6
Boring machine, Diamond....*164
Bus, air conditioned....*288
Butter cutter redesigned.... *11
Car, trolley, streamlined Brilliner....*471
Castings in design.... *19
Centrifugal castings *242
Crane truck *210
Crank shaper for automobiles.... *52
Cutting machine, automatic....*248
Dental chair has motor operated hydraulic lift *250
Dial, illuminated circular....*468
Diesel engine of modern design.... *53
Dishwasher redesigned *19
Draft control for furnaces and stokers *245
Drafting room practices. H. J. Delchamps, pt. 1, *90; pt. 2....*142
Drill, radial electric.... *8
Drilling machine, Bradford....*161
Drop forgings—why they should be streamlined *16
Engine has combination fan-flywheel.*326
Engineering design activities as reported by 460 manufacturers....*422
Fans, motor driven—their early history and development. Wilcoxson & Lloyd *171
Fiat automobile model has reversed engine *55
Filter, Oliver vacuum....*208
Fire fighting truck with extension ladder *469
General Motors' new diesels.... *94
Grinder, hydraulic chucking....*330
Grinder, vertical station-type....*248
Labeling machine has suction feed...*286
Lawn mower, die cast....*468
Molded plastics—selecting the material and designing the part. C. W. Blount *462
Molding machine, full automatic injection *470
Molding press *50
Motor and pump designed for deep-well *325
Motors, shaftless. R. J. Owen....*261
Motors, special. C. T. Button....*291
Oil well pumping unit....*441
Pantograph, three dimensional precision *136
Paver, dual-drum, redesigned....*438
Photoelectric relay for light control..*139
Plastic molding machine....*388
Press, straightening *209
Press with electrically controlled air operated friction clutch....*391
Plug-in meter for machinery.... *54
Printing pump unit....*440
Projector has metered lubrication....*392
Pump, Fairbanks-Morse *206
Resistance welding. L. H. Frost, pt. 1, *22; pt. 2, *37; pt. 3....*176
Review of design developments....*424
Sand gun *56
Separator, magnetic *55
Survey of the status of design activity. G. F. Nordenholdt....*103
Sweeper, street, redesigned....*394
Tire vulcanizing press.... *51
Tractor, Automatic Transportation...*328
Tractor radiator air-cools crankcase oil *246
Trailer has wishbone coupler and third wheel *10
Transmission, variable speed hydraulic drive *93
Washer with timing control....*163
Water heater *12
Weight and WR² for rounds per inch of length, steel weighing 0.2816 lb. per cu. in. T. S. White (Ref. Bk. Sheets) *319
Welded designs, built up, require complete shop equipment....*296
Desk and phone cabinet....*11
Dial, illuminated circular....*468
Die forgings. Waldemar Naujoks, *216; pt. 2 ....*294
Directory of materials, parts, equipment. Apr. 57–122
Dishwasher *10

Drawings:

Drafting room practices. H. J. Delchamps, pt. 1, *90; pt. 2....*142
Drill, radial *5
Drill, radial electric.... *8
Drilling machine, Bradford....*161
Drilling machine has interlocked hydraulic electric control....*448

Drives:

Accelerated and decelerated linear motion elements. J. E. Hyler.... *28
Chrysler Vee reduction drive for boats *162
Torque motor drives for stalled and high inertia loads.... *2

E

Editorials:

Another golden opportunity is here... 89
Can there be progress without profit? 45
Changed picture 461
Mathematics prove—emotions rule... 281
Not politics—just common sense..... 157
That thing called experience..... 131
They dedicate their lives to progress 321
Things are not as bad as they seem.. 241
What makes a masterpiece?..... 421
What was done can be done again... 201
Your product and its sales curve..... 1
Electronics—see Photo-electric cell

Engines:

Air-cooled heavy duty industrial engine of four cylinders....*326
Crankless diesel engine....*426
Diesel engine of modern design.... *53
General Motors' new diesels.... *94
Escalator step *7

F

Fans:

Fan, exhaust *12
Motor driven fans—their early history and development. Wilcoxson & Lloyd *171
Fastenings, sheet metal....*348
Fatigue tester has electronic control..... 121
Filing clippings. H. W. Sachs..... 26
Filing tracings. J. E. Hyler..... 26
Filter, Oliver vacuum....*208
Fire fighting truck with extension ladder.*469
Fluorescent coating used for light source 312

Forgings:

Die forgings. Waldemar Naujoks, *216; pt. 2....*294
Drop forgings. L. E. Scrannage....*110
Drop forgings—why they should be streamlined *16
Forged parts *211
Standard tolerances for forgings (Ref. Bk. Sheets) 129
Ten steps in designing forgings..... 112
Why forged bosses are stronger. L. L. Lawson *74
Frames, deflections in. F. M. Cousins....*179

G

Gears:

Calculating gear centers. W. B. Jordan *75
Gear-bore proportions. P. N. Bland.. 74
Gear-bore proportions. F. W. Shaw.. 25
Gear center calculation. Ernest Voyt. 186
Gear hobbing machine....*466
Geneva motion gearing. C. Neklutin..*405
How many teeth in contact?..... 186
How many teeth in contact? Shaw, Rantsch 267
Iron as a gear material. D. W. Diefendorf *71
Rolling qualities of bevel gears. E. J. Rantsch 186

Glass:

Developments in glass.... 434
Governors for motors. F. W. Yarline....*106

Grinders:

For non-precious chrome alloys.....*212
Hydraulic chucking grinder....*330
Portable profile *210
Vertical-station-type machine *248
With built-in electrical controls.....*446
Grinder shaft *98
Groove depth calculations. R. G. N. Evans *345
Gun, grease *167

H

Hardening, flame, for lathe bed.....*250
Heater, water *12
"Heet-hp." electric cooker.....*454
Hoist, chain, has cushioned load hook....*166
Hoist, Robbins & Myers.... *3
Hopper bucket *5
Humidistat for mounting against window. *97
Hydraulic repairing machine.....*455

I

Impact testing of steel....*332
Industrial prosperity (ed)..... 201
Insulation, glass tape for motor..... 191
Iron, electric *12
Ironer, modernized *331

J

Joints, aluminum alloy. Bennett & Fernsler *472

L

Labeling machine has suction feed.....*286
Lawn mower, diecast....*468
Lever-crank linkage. W. H. Rasche..... *99

Lighting:

Dome lighting unit....*207
Inbuilt lighting unit as part of drill press. J. W. Naylor....*185
Lamp, polaroid *331
Light, Orthoplane *56
Lubrication, metered, on projector.....*392

M

Magnet coil design. F. L. Moses *483 (Ref. Bk. Sheets)..... 503
Magnetic measurement of coating thickness 190

Materials:

Analysis of variations in products. A. G. Brooks *322
Directory of materials, parts, equipment. Apr. 57–122
Impact testing of steel....*332
Non-metallic materials used in design *432
Sealing ceramics to metals. Samuel Wein 74
Selecting material and the type of fabrication for castings..... *19
Textured enamels for improved wrinkle finishes. A. Miesem.....*254
Meat chopper *452

Mechanisms and Constructions:

Accelerated and decelerated linear motion elements. J. E. Hyler..... *28
Aluminum alloy joints—edge distance and allowable bearing stresses. Bennett & Fernsler....*472
Areas of regular polygons. C. P. Nachod (Ref. Bk. Sheets).....*239
Beams under simultaneous transverse and axial loading. R. J. Roark (Ref. Bk. Sheets)..... *42
Belleville spring design. Victor Tatarinoff *227
Deflections in frames. F. M. Cousins.*179
Deflection of trapezoidal-shaped cantilever. Alexis Thompson.....*404
Determining safe stresses for parts subjected to alternating and steady loads. J. B. Kommers.....*395
Elastic models for comparing stresses in welded joints. E. W. P. Smith..*400
Electronic control. R. A. Powers, *132; pt. 2, *168; pt. 3, *219; pt. 4, *340; pt. 5....*385
Factors of stress concentration. R. J. Roark (Ref. Bk. Sheets).....*153; *198
Forced vibrations and resonant frequencies in machinery. Dr. H. O. Fuchs, pt. 1, *256; pt. 2, *299; pt. 3.*479
Formulas for elastic bodies. R. J. Roark (Ref. Bk. Sheets).....*278
Grinder, hydraulic chucking.....*330
How to select motors. Martin Schiff, pt. 1, *182; pt. 2....*222
Iron as a gear material. D. W. Diefendorf *71
Lever-crank linkage. W. H. Rasche *99 ....*310
Mechanism for right angle motion. J. E. Hyler..... *73

Minimum surface area. T. J. Higgins 308
Motors, universal *46
Radii of inscribed and circumscribed circles of regular polygons. C. P. Nachod (Ref. Bk. Sheets)..... *240
Right angle motion mechanism. W. H. Rasche *184
Shaftless motors. R. J. Owen..... *261
Starting torque of split-phase motors. Puchstein & Lloyd (Ref. Bk. Sheets) pt. 2 ..... *87
Stresses and deflections in trunnions and drum heads. F. L. Requa (Ref. Bk. Sheets)..... *459
Stresses in pressure vessels. R. J. Roark (Ref. Bk. Sheets) pt. 1, *358; pt. 2..... *418
Temperature controls electrically operated. R. A. Smart..... *202
Torque motor drives for stalled and high inertia loads..... *2
Typical variable-speed transmissions. Cyril Donaldson, pt. 1, *116; pt. 2, *188; pt. 3, *264; pt. 4..... *402
Working stresses for fluctuating loads. Joseph Marin *251

Metals:

Alloys and metals used in design..... *425
Comparison of physical properties of some common metals..... 334
Iron as a gear material. D. W. Diefendorf *71
Metallic coatings. J. Delmonte, pt. 1, *113; pt. 2..... *174
Non-ferrous alloys for springs. R. W. Carson *213
Notch toughness *332
Raising the modulus of cast iron. E. W. Clem 491
Sealing ceramics to metals. Samuel Wein 74
Meter, plug-in, for machinery..... *54
Miller, multi *471
Mixer, electric *452
Mixer, truck *427
Mixer's stuffing box..... *98
Molding machine *444
Molding machine, full-automatic injection. *470
Molding machine, injection..... *449
Molding machine, plastic..... *388
Molding press *50
Moto-tool *471

Motors:

Compound-wound motor for trolley coaches 408
Developments in electric motors and devices *445
Governors for motors. F. W. Yarline. *106
How to select motors. Martin Schiff, pt. 1, *182; pt. 2..... *222
Motor has nine-to-one length diameter ratio *325
Shaftless motors. R. J. Owen..... *261
Special motors—when and why to use them. C. T. Button..... *291
Standard motors are economical. C. M. Sayre *335
Starting torque of split-phase motors. Puchstein & Lloyd (Ref. Bk. Sheets) pt. 2 ..... *87
Torque motor drives for stalled and high inertia loads..... *2
Universal motors *46

N

New materials and parts....33, 80, 123, 150, 192, 232, 271, 313, 352, 496
Notch toughness *332

O

Oil burner, pressure-type..... *394

P

Packing for pumps. N. V. Smith..... *266
Pantograph, three dimensional precision. *136

Parts and Units:

Automobile radio automatic tuning control *327
Bearing construction. A. B. Willi.... *381
Boring machine, Diamond..... *164
Brake, two speed, for bicycles..... *162
Designing plastic parts. F. H. Johnson *60
Desk and phone cabinet..... *11
Developments in mechanical parts.... *436
Die forged parts. Waldemar Naujoks, *216; pt. 2..... *294
Drive, Chrysler Vee reduction..... *162
Drop forgings. L. E. Scrannage..... *110
Drop forgings—why they should be streamlined *16
Engine, crankless diesel..... *426
Escalator step *7
Fastenings, sheet metal..... *348
Filter, Oliver vacuum..... *208
Governors for motors. F. W. Yarline. *106
Hard facings to add life to parts. M. C. Smith *62
Heavy duty power pump..... *206
Humidistat for mounting against window *97
Motors, standard, are economical. C. M. Sayre *335
Motors, universal *46
Plastic molded parts design. F. W. Warner *76
Plugs, caps and covers. H. J. Martin, pt. 1, *456; pt. 2..... 492
Scale weight reduced by aluminum die castings *327
Springs, adjustable extension. Henry Martin *224
Thermostat night thermostat and humidistat *96
Tractor steers without swiveling wheels *328
Transformer, radio-type *139
Types of automatic timers. Gilbert Smiley *146

Patents:

Bill to provide for compulsory licensing of patents. G. F. Nordenholt.. *158
Can there be progress without profit? (ed) 45
Case histories in patent law. H. A. Toulmin, Jr. 32, 122, 231, 302, 409
Contributor infringement considerations involving engineering design. H. A. Toulmin, Jr..... 487
New patent legislation (ed)..... 157
Viewpoints on the patent question... 118
What is not invention. H. A. Toulmin, Jr., pt. 2, *65; pt. 3, 259; pt. 4 343
Paver, dual-drum *438

Photo-electric Cells:

Electronic control. R. A. Powers *132; pt. 2, *168; pt. 3, *219; pt. 4, *340; pt. 5 ..... *385
Electronic relay for light control.... *139
Phototube applications. R. A. Powers 145

Plastics:

Design of plastic molded parts. F. W. Warner *76
Designing plastic parts. F. H. Johnson *60
Developments in plastics..... *432
Molded plastics—selecting the material and designing the part. C. W. Blount *462
Scale has plastic molded housing.... *140
Plating developments *451
Plug-in electrical instruments for machinery *54
Plugs, caps and covers. H. J. Martin, pt. 1, *456; pt. 2..... *492
Polygon, area of regular. C. P. Nachod (Ref. Bk. Sheets)..... *239
Polygon, radii of inscribed and circumscribed circles of regular polygons. C. P. Nachod (Ref. Bk. Sheets)... *240
Press, molding *50
Press, straightening *209
Press, tire vulcanizing..... *51
Press, with electrically controlled air operated friction clutch..... *391
Projector has metered lubrication..... *392
Public relations for industry..... *361
Pulley for driving lighting generator.... *284

Pumps:

Blower-pump design *6
Deep-well design of motor and pump. *325
Heavy duty power pump..... *206
Oil well pumping unit..... *441
Printing pump unit..... *440

R

Radiator shutters, manually controlled, for automobiles *97

Radio:

Automatic tuning for automobile radios *327
Cabinet for radio of single piece..... *290

Range:

Combination gas-electric *331
Heavy-duty electric *430
Westinghouse Electric *96
Reel, plastic *12

Reference Book Sheets:

Areas of regular polygons. C. P. Nachod *239
Beams under simultaneous transverse and axial loading. R. J. Roark... *42
Factors of stress concentration. R. J. Roark *153, *198
Formulas for elastic bodies. R. J. Roark *278
Radii of inscribed and circumscribed circles of regular polygons. C. P. Nachod *240
Starting torque of split-phase motors. Puchstein & Lloyd, pt. 2..... *87
Standard tolerances for forgings..... 129
Stresses and deflections in trunnions and drum heads. F. L. Requa..... *459
Stresses in pressure vessels. R. J. Roark, pt. 1, *358; pt. 2..... *418
WR² and weight. T. S. White..... *319

Refrigeration:

Coldspot refrigerator *96
Stewart-Warner refrigerator *96

Research:

Laboratory includes miniature steel plant *407
Research in America—the key to better living *368
Why industry must tell the story of research *366
Resin coatings that can be applied cold. M. C. Smith..... *303
Reversing mechanism. S. H. Helland.... *346
Rolling mill stand..... *4
Roll-over, power operated..... *167

Rubber:

Rubber-like gasket material..... 435
Synthetic rubber or thiokol..... 190

S

Sand gun *56
Saw, tilting arbor..... *209
Sawmill carriage *3
Scale has plastic molded housing..... *140
Scale weight reduced by aluminum die castings *327
Screw driver, electric..... *331
Separator, magnetic *55
Shaper, auto crank..... *52
Shovel, power *4

Springs:

Adjustable extension springs. Adam Fredericks *308
Adjustable extension springs. Henry Martin *224
Belleville spring design. A. Lazlo... 345
Designing Belleville springs. Victor Tatarinoff *226
Motor spring design charts..... 489
Non-ferrous alloys for springs. R. W. Carson *213

Stampings:

Advantages of die-cast or stamped parts. Herbert Chase, *282; pt. 2..*398

Standardization:

Malleable iron fittings standards revised 350

Steel:

Alloy additions 141
New hardening method keeps steel ductile 78
U. S. Steel research..... 30
WR² and weight. T. S. White (Ref. Bk. Sheets) *319
Sterilizer, dental *467

Stresses:

Aluminum alloy joints—edge distance and allowable bearing stresses. Bennett & Fernsler..... *472
Deflections and stresses in trunnion and drum heads. F. L. Requa (Ref. Bk. Sheets)..... *459
Determining safe stresses for parts subjected to alternating and steady loads. J. B. Kommers..... *395
Elastic models for comparing stresses in welded joints. E. W. P. Smith... *400
Factors of stress concentration. R. J. Roark (Ref. Bk. Sheets).. *153, *198
Formulas for elastic bodies. R. J. Roark (Ref. Bk. Sheets)..... *278
Stresses in pressure vessels. R. J. Roark (Ref. Bk. Sheets) pt. 1, *358; pt. 2 ..... *418
Working stresses for fluctuating loads. Joseph Marin *251

Suspension systems, front wheel, on passenger cars *306
Sweeper, street *394

T

Table, tilting *167
Tape dispenser *166
Thermostat, night thermostat and humidistat in one unit *96
Timers, automatic. Gilbert Smiley *146

Tractors:

Tractor radiator air-cools crankcase oil *246
Tractor tire machine *3
Tractor steers without swiveling wheels *328
Trailer has wishbone coupler and third wheel *10
Trains, streamlined 20th Century *229
Transformer, radio-type *139

Transmission:

Typical variable-speed transmissions. Cyril Donaldson pt. 1, *116; pt. 2, *188; pt. 3, *264; pt. 4 ..... *402
Variable speed hydraulic drive *93
Truck, industrial *428
Tube end reinforcements *138

V

Vacuum cleaner, bagless, washes air *329
Variations in products, analysis of. A. G. Brooks *322
Vending machine parts *285
Vibrations, forced and resonant frequencies in machinery. Dr. H. O. Fuchs, pt. 1, *256; pt 2, *299; pt. 3 479

W

Washer, Easy *453
Washer with automatic timing control *163
Weight and WR² for rounds per inch of length, steel weighing 0.2816 lb. per cu. in. T. S. White (Ref. Bk. Sheets) *319

Welding:

Built-up welded designs require complete shop equipment *296
Elastic models for comparing stresses in welded joints. E. W. P. Smith .. *400
Hard facings to add life to parts. M. C. Smith *62
Railroad dump car welded *431
Resistance welding. L. H. Frost, pt. 1, *22; pt. 2, *57; pt. 3 ..... *176
Resistance welding high carbon steel wire 187, 308
Welder, special press *138
Window sash holder *98
Wire stripper *212
